Recertified Windows 10 Computers

All include 1 Year Warranty!

With the end of Windows 7 support quickly approaching, IT Xpress is offering a selection of recertified business desktops and laptops that are well built, run Windows 10 Pro, have ultra fast solid state hard drives, and a 1 year warranty! **But do you need to actually replace your computer?**

Your Windows 7 computer will still work on January 15th, the day official support ends. The end of support means Microsoft will not be releasing any more security updates for Windows 7. So over time as vulnerabilities are found, the system becomes more vulnerable. We strongly encourage our clients to get to Windows 8 or 10 across their network by then, but if it stretches into February you will probably be fine, especially if you have solid virus protection.

Your existing hardware may also be upgradable to Windows 10 instead of replacing it. We strongly recommend upgrading regular hard drives to solid state drives, which will give existing hardware a boost in performance and a few more years of life on Windows 10, without the expense of replacement.

If you are a current My ITXpert client, as we review your exact hardware, we'll give you guidance on any machines we feel are worth upgrading. If you are not a current client and want to know if your system(s) can be upgraded, click the Start Menu and type CMD. When the black cmd icon appears, right click it and select 'Run As Administrator'. Click YES to allow changes and in the black window that appears, type **dxdiag** and hit Enter. Wait. Click No when asked to check driver signatures. After a bit, a window with your system's inner details will appear. Click the 'Save All Information' button and send the saved text file to sales@itxpress.biz so we can review the system configuration and determine if it's worth upgrading

With all that said, if you do need to replace existing machines (or expand your network with additional PCs), we're proud to offer a robust selection of recertified business machines. **Business grade PCs are built sturdier and include expanded connectivity and internal HW features that consumer grade PCs do not.** Plus Windows 10 Pro is **required** if you have a Microsoft Domain managing your infrastructure.

[Do I Need A New Monitor or Keyboard/Mouse?](#)

This is completely up to you. Our systems will work with all existing peripherals. 24" LCD monitors can be purchased for < \$149. 21" Monitors often for \$99 or less. Wireless keyboard/mouse combos are \$30. So they will add to the replacement cost, but you probably will still save over buying a new PC w/o them.

Budget Desktop

This budget desktop is ideal to replace a large form factor desktop for typical business use. It measures 13.3" x 3.9" and is 14.9" deep.

The HP EliteDesk 800G1 Small Form Factor includes:

- Fast 4th Gen Intel i5 3.2 GHz 4 Core CPU w/3.6 GHz Turbo
- 6 USB 2.0, 4 USB 3.0, & 1 Serial Port for peripherals
- Sturdy Steel small form factor (SFF) Chassis to save space
- VGA Port plus Dual Digital DisplayPorts for connection to any type of digital monitor (DVI, HDMI)
- Expansion ports: (2) x16 PCIe, (2) x1 PCIe for add on cards (High End Graphics, peripherals, etc.)
- DVD Drives are available by request. PS/2 Keyboard/Mouse Connections
- Streamlined Cooling (Processor cooling vents directly out of the case)

We offer three models with a variety of storage and memory sizes/types:

HP 800G1 SFF	Standard	Pro	Premier
Memory	4GB DDR3 RAM	8GB DDR3 RAM	8GB DDR3 RAM
Storage	256GB Solid State HD	256GB Solid State HD	512GB Solid State HD
Price	\$299*	\$329*	\$369*

All refurbished desktops include our New PC Setup service, ensuring you have the latest operating system updates and the proper selection of hardware drivers to ensure smooth stable operation of Windows 10. Migration of user data/applications from old computers is separate. Larger RAM/SSD available by request.

Mid Range Desktop

This small desktop is ideal to replace most business grade PCs handling Office 365, Quickbooks, and other office applications.

The HP EliteDesk 800G1 Ultra Slim desktop is an ideal desktop upgrade for small and medium businesses with limited desk/counter space. **Measuring 10" square and only 2.6" high**, this unit will fit almost anywhere (including under most flat screen monitors for better ergonomics!). We offer a variety of models to meet the specific needs of each client.

All HP Elite 800G1 USDT Recertified Desktops include:

- Fast 3rd Gen Intel i5 2.9-3.1 GHz Quad Core Processor w/3.8 GHz Turbo
- 6 USB 2.0 and 4 USB 3.0 Ports for peripherals

- Sturdy Steel Ultra Slim Chassis to save space
- VGA Port plus Dual Digital DisplayPorts for connection to any type of digital monitors (DVI, HDMI)
- Expansion ports: (1) mini PCIe, (1) mSATA, (1) MXM Graphics Expansion Slot
- DVD Drives are available by request.
- Streamlined Cooling Channel (Front Intake -> Processor -> Interior -> Back)
- Need better graphics? ATI/AMD HD7650 2GB DDR3 Video Card w/180W Power Supply **\$129**

We offer three models with a variety of storage and memory sizes/types:

HP Elite 8300	Standard	Pro	Premier
Memory	4GB DDR3 RAM	8GB DDR3 RAM	8GB DDR3 RAM
Storage	256GB Solid State HD	256GB Solid State HD	512GB Solid State HD
Price	\$329*	\$359*	\$399*

All refurbished desktops include our New PC Setup service, ensuring you have the latest operating system updates and the proper selection of hardware drivers to ensure smooth stable operation of Windows 10. Migration of user data/applications from old computers is separate. Larger RAM/SSD available by request.

Mini Desktop

This tiny desktop packs a lot of power into a small 7"x7"x1.3" package! It's great for workspaces with little room or that you want to keep uncluttered.

The HP EliteDesk 800G2 Mini includes:

- Fast 6th Gen Intel i5 2.5 GHz Quad Core CPU w/3.1 GHz Turbo
- 6 USB 3.0 & 1 USB-C 3.0 (1 Serial Port optional)
- Sturdy Steel mini form factor (SFF) Chassis to save space
- VGA Port plus Dual Digital DisplayPorts for connection to any type of digital monitors (DVI, HDMI)
- Streamlined Cooling (Processor cooling vents directly out of the case)

We offer three models with a variety of storage and memory sizes/types:

HP Elite 8300	Standard	Pro	Premier
Memory	4GB DDR4 RAM	8GB DDR4 RAM	8GB DDR4 RAM
Storage	256GB Solid State HD	256GB Solid State HD	512GB Solid State HD
Price	\$389*	\$439*	\$499*

All refurbished desktops include our New PC Setup service, ensuring you have the latest operating system updates and the proper selection of hardware drivers to ensure smooth stable operation of Windows 10. Migration of user data/applications from old computers is separate. Larger RAM/SSD available by request.

*** These prices are approximate. Costs for refurbished desktops and solid state drive upgrades can vary week by week. These are the average prices based on recent price movements. We will confirm exact pricing with you when you place your order.**

Laptops

Because of the wide variety of models and the almost daily change in pricing, it's hard to list models of recertified laptops we often carry. But our refurbished laptops are always within a range of specifications and pricing ideal for business (and residential):

- Minimum Intel i5 Processor (i7's Available)
- Minimum 4GB of DDR3 or 4 RAM (8GB recommended for most business use)
- Minimum 1366x768 resolution display in 14.1 and 15.6" Sizes
- Minimum 256GB Solid State Hard Drive (512, 1TB and 2TB available by request)
- All business laptops we sell can be docked into optional docking stations, allowing for easy connection to external monitors, networking, peripherals, and power.
- We tend to carry Lenovo Thinkpads and HP Probooks. Both are sturdy, have a variety of ports and work well with Windows 10 Pro.

What Are Solid State Drives?

Solid State hard drives offer a significant performance improvement over normal hard drives, often 10-15 times faster than standard hard drives. These systems will boot in seconds and applications will start almost instantly. We can also install larger 512GB, 1TB and 2TB solid state drives for an additional cost if storage requirements dictate. If your desktops store sensitive data such as HIPAA regulated healthcare information or other sensitive data like credit cards, SSNs, legal documents, etc. - we can install advanced solid state drives with built in hardware encryption, which provide security without the usual performance impact of encrypting your system drive..

How Much RAM Do I Need?

The amount of memory or 'RAM' needed for a desktop depends on the expected use. If a desktop is used to primarily run 1-2 applications (web browser, email, a couple Office documents), 4GB is OK. If you expect to run many applications at once, open many browser tabs simultaneously, or use memory hungry applications such as Quickbooks, photo/video editors or custom business applications that run your business, 8GB-16GB is **definitely** recommended. **We recommend 8GB as the minimum for business use to ensure the systems are fast and responsive for years as Windows and applications grow in size.**

Mounting Accessories

Given the small size of the HP 800G1 Ultra Slim desktops, we're excited to also offer these **unique monitor stands** which allow you to hide the desktop behind your existing VESA mountable monitor. If your monitors do not support VESA mounts or you'd like to upgrade, we can get 21-24" LCD Monitors for \$99-\$139 depending on size and brand. These stands are available for **\$79 each**.

HP EliteDesk 800G1 Stand (Monitor Not Included)

We also can mount the HP EliteDesk 800G2 desktops onto the back of most VESA compatible LCD monitors with a special mounting bracket. These brackets can also be used to mount the 800G2 underneath a shelf or counter. These brackets usually cost \$49-\$69.

What About My Existing Applications and Data?

If you feel comfortable handling the on site work of swapping out the hardware and setting up things like your business applications, printers, etc., we can do most data transfers in our store for \$69 per system.

If you would rather have us handle the process from start to finish, this is more labor intensive and we recommend clients budget 2-3 hours of labor (@ \$89/hour) per system to allow our technicians to:

- Copy all user data onto external storage

-
- Swap out the hardware (and if needed monitors, keyboards, etc.)
 - Configure system on network/domain
 - Copy user data back from external storage
 - Setup Printers/Scanners as needed
 - Setup Business Applications as needed (If system acted as a 'server' - add 0-2 hours)

What About Repairs?

We try to stick with a small selection of PC models so we can keep a number of model specific parts on site like power supplies and motherboards. This allows us to repair most models the same day or within 1-2 days to get you back up and running quickly.

All recertified systems come with a 1 Year Warranty on parts and labor!
